

PREK-GRADE 5 MATH LEARNING COMMUNITY SURVEY

GOAL OF THE SURVEY

To gain insight into the degree to which the math learning community members have reach the medium term outcomes and to recommend any changes that can be made to increase the degree of actualization.

QUESTIONS:

1. Participating in the Math Learning Community has increased my enjoyment of teaching mathematics.

I strongly agree.	I agree somewhat.	I disagree somewhat.	I strongly disagree.	I don't know.
-------------------	-------------------	----------------------	----------------------	---------------

2. The Math Learning Community has been helpful in improving my teaching practice and knowledge of mathematics.

I strongly agree.	I agree somewhat.	I disagree somewhat.	I strongly disagree.	I don't know.
-------------------	-------------------	----------------------	----------------------	---------------

The main reason for this response is:

3. I am able to apply my new knowledge of instructional practices in mathematics into the classroom.

I strongly agree.	I agree somewhat.	I disagree somewhat.	I strongly disagree.	I don't know.
-------------------	-------------------	----------------------	----------------------	---------------

The main reason for this response is:

4. I feel like I am a part of a community of learners who share their learning with each other.

I strongly agree.	I agree somewhat.	I disagree somewhat.	I strongly disagree.	I don't know.
-------------------	-------------------	----------------------	----------------------	---------------

5. I feel like I have very little voice and choice in my professional learning within the math learning community.

I strongly agree.	I agree somewhat.	I disagree somewhat.	I strongly disagree.	I don't know.
-------------------	-------------------	----------------------	----------------------	---------------

6. How confident do you feel about teaching the mathematics curriculum of your grade level(s)?

Very confident about all aspects of curriculum.	Confident about most aspects of the curriculum.	Confident about some aspects of the curriculum.	Not confident about teaching the curriculum.
---	---	---	--

7. The most effective resources and opportunities supporting my teaching and learning of mathematics through the math learning community have been:

--

8. Is there any other information you believe would help with our evaluation of the Math Learning Community? We are particularly interested in any positive or negative impacts the community has had on your teaching or the learning of your students.
